Objectives:

At the end of this program, participants will be able to:

- Describe select strategies to identify achievable outcomes
- Describe successful strategies for implementing change in clinical practice
- Describe the differences between process improvement, evidence-based practice and nursing research projects in patient education
- Discuss the strengths and pitfalls of data collection using an electronic documentation system
- Discuss strategies to identify gaps in the current evidence in practice
- Identify the elements needed for successful submission for publication
- Describe the similarities and differences between a grant proposal and a research proposal
